

# Family Therapy for Anorexia Nervosa (FT / AN):

## Family Therapy Approaches to the Treatment of Adolescent Anorexia Nervosa

### When:

Tuesday 28<sup>th</sup> to Thursday 30<sup>th</sup> April 2020

### Where:

ORTUS learning and events centre  
82 – 96 Grove Lane, London, SE5 8SN

### Programme Facilitators:

#### Ivan Eisler

Professor of Family Psychology & Family Therapy

#### Anastassis Spiliadis

Systemic Psychotherapist

### Background:

Our service is a nationally and internationally renowned for clinical and research evaluation of psychological treatments for eating disorders. Findings from our studies are frequently quoted as providing the principal evidence for the effectiveness of family therapy for adolescent anorexia nervosa.

The majority of our treatment is provided on an outpatient basis using **Systemic Family Therapy for the treatment of anorexia nervosa**, often described as the **Maudsley Approach** or the **Maudsley Model**. Our treatment model places a strong emphasis on working closely with families, helping them to re-discover their strengths and resources with the parents taking an active role in finding ways to overcome their child's illness.

### Aims of this Programme:

- To promote evidence-based practice in the treatment of Eating Disorder (NICE Guidelines, 2017).
- To present the research and theoretical underpinning of this approach and to illustrate how the theory relates to the practice.
- To offer an overview of the ethos, theoretical and clinical base for the approach with a strong emphasis in multi-disciplinary team (MDT) working.
- To illustrate through facilitative group participation how families engage in treatment by using psycho-educational and therapeutic techniques relevant to treating eating disorders.
- To provide participants with the skills, knowledge and confidence in order to apply this model to their relevant clinical setting.

## What the Programme Offers:

The training consists of a 3-day intensive programme with a combination of didactic and experiential components, including case discussion.

**On request we can provide continuous supervision and consultation for teams trained as separate tariffs.**

## Key Outcome:

- At the end of the training participants will have the skills and competencies required to be able to apply the approach in their own clinical setting.

Our trainings promote the development of a MDT approach ethos; therefore we encourage, and will prioritise, the attendance of more than one professional from each team.

We recommend early booking to guarantee a place and thus avoid disappointment.

## Cost:

### 3 Day intensive programme

**£750.00 per person** – including materials and refreshments

*Teams who attend with 3 or more colleagues will receive a 20% discount per person and a 1 hour Skype consultation or supervision session.*

## Who can Apply:

This training is for clinicians working within a multi-disciplinary child and adolescent eating disorders team, who hold clinical responsibility (i.e. Psychiatrists, Family Therapists, Psychologists, Psychotherapists, Nurse Specialists). Dieticians, Paediatricians and other professionals working within the team could attend with their colleagues.
